

# FACE SHIELD TECHNICAL DATA SHEET

The XPEL FACE SHIELD is constructed of an aliphatic TPU-based (Thermoplastic Polyurethane) product. Typical physical properties of our product include transparency, elasticity and resistance to oil, grease and abrasion. The FACE SHIELD is constructed with a very low surface energy film designed to resist staining and offers superior environmental resistance and protection. The clear coat employs special elastomeric polymers that allow minor scratches in the surface to “heal” over time, leaving line of sight unobstructed.
